Let Us Make You A Celebrity Legacy Videos

Every family has stories, and memories and certain things you hold dear. Don't you just love recalling the past, going through photo albums and maybe even pulling out home videos?

We at AFT take it a step further, and truly capture your family memories and consolidate them into a professional and entertaining video biography. By doing this, it not only preserves old family media and your unique heritage, but it brings you closer together and passes on these stories and traditions to future generations. Wouldn't you have cherished a gift that allows you to know your grandparents in a deeper, and more interactive way?

We take whatever you want to provide (old photos, old family VHS and film reels) and help you tell the story of your family's journey and the memories that go with it by interviewing you and your family in your home. In the end, you have a thoroughly entertaining documentary that you can watch again and again on DVD, without worry of whether it will fade away with time.
